💼 Professional Experience

2KeK Games Bilişim Teknolojileri A.Ş., *Intern*   06/2024 – 07/2024
-*Developing the login section of an admin panel for a website.*
-*Created a simulator and generated its corresponding graph.*
-*Utilized the AI tool Stable Diffusion to design various images.*

🎓 Education

Computer Engineering, *Balikesir University*   09/2021 – present

📁 Personal Projects

News Summarizer and Classifier 🔗
-Developed a Python-based application that fetches real-time news from multiple RSS feeds.
-Implemented Latent Semantic Analysis (LSA) for automatic news summarization.
-Trained and compared machine learning models (Naïve Bayes, Logistic Regression, Random Forest, SVM) for news classification.
-Designed an interactive GUI with CustomTkinter for user-friendly experience.
-Used parallel processing to improve performance when handling large datasets.

Turkey's 100th anniversary themed website 🔗
- Developed using HTML, CSS and JAVASCRIPT.
- Photos and text of photos were made by artificial intelligence.
- It was designed to be responsive so that it can work on any device.

Quiz Game 🔗
- Developed a quiz game using C# Forms.
- The duration of each question is reduced and there is a system that plays music in the background and the music level can be adjusted.

Flappy Bird (Clone) 🔗
- The exact same mechanics of the Flappy Bird game were used and a simple game with one level was made.
- It was made using simple unity mechanics.

🏅 Certificates

Applied Entrepreneurship Training Participation Certificate by KOSGEB

Kodluyoruz Hi- Kod Front End Workshop 🔗

LinkedIn'de Etkili Profil Oluşturma 🔗

🧩 Technical Skills

Skills: C#, Javascript, SQL, React

Developer Tools: Git, VS Code, Visual Studio,
